Subject: [EXTERNAL] Notes from Gorge Dam conference call

Hello All – thanks again for participating in the call this morning. It was kind of one of those chicken and egg situations – do we do the rendering first and then apply the offsets/constraints or give you the constraints first and then you do the rendering? I think the call worked out well because we were able to see and discuss both at the same time.

Please take a quick look at the notes I put together and let me know if you have any edits.

SMP – in particular, please review the “factors that went into SMP’s rendering” section and feel free to add on to the list and/or expand on the ones already there.

Thank you!
-Mary Beth
